Regional Bureau for Transfer Management Educational Section Euskirchen (RÜM)

Further Education—Your Key to the Future

GEFÖRDEBT VOM

What ist RÜM?

In the urban and rural district of Euskirchen, numerous projects and initiatives have been started, structures erected and people involved in helping young people manage the leap from school to career. Despite the fact that these facilities have been in place for some years, few of our young people are able to find their way through the dense thicket of activities offered at this present time. They are often unable to understand the reason and purpose of the counselling and facilities offered during their time at school nor can they always manage the transfer from school to career successfully.

RÜM seeks to simplify the process and so help young people to cross this bridge from school to job satisfactorily.

Our objectives are

- to coordinate the activities of all those involved in education so that they may rationalise their functions, activities and tasks
- to reach consensus on the career advice they give and career opportunities they offer in the local and regional catchment areas according to the real needs of the young people
- to determine the present state of educational opportunities on offer in the Euskirchen catchment area and so to achieve a clearer picture of how the school-to-job transfer is managed locally!

On what are we focusing our special interest?

- on establishing networks and local partnerships
- on coordinating existing networks in the sphere 'school-to-job'
- on optimising the statistics in the sphere 'school-to-job'
- on achieving a long-lasting improvement in the opportunities available to disadvantaged youngsters in their basic and further education
- on evaluating the current situation in regard to both future trainees and the needs of industry and commerce
- on establishing minimum standards in career-orientated procedures
